

BLADE VALIDATE

Cybersecurity Maturity Model Certification (CMMC)

Automated Assessment Readiness Application

FOR MORE INFO

OVERVIEW

Blade Validate (BLV), powered by **KDM Analytics** is an **automated CMMC Level 1 and Level 2 assessment readiness platform** that replaces manual, disconnected compliance efforts with a structured, model-driven approach.

Instead of relying on spreadsheets, static diagrams, and consultant-heavy workflows, BLV **digitally captures your system boundaries, assets, and CUI flows** in a structured model. It makes the digital system diagram and boundaries the authoritative core, automating one of the most time-intensive and error-prone activities of CMMC readiness.

This model drives your documentation, diagrams, readiness scoring, and audit outputs, giving you a clear, defensible path to CMMC compliance.

WHO CAN WE HELP

- Current and future DoD contractors
- Organizations handling Controlled Unclassified Information (CUI)
- Organizations managing Federal Contract Information (FCI)
- CMMC Pre-assessors

BENEFITS

Model-Driven Consistency: All diagrams, documentations, and SSPs come from one authoritative core model.

Defensible, Audit-Ready Outputs: Maintain a clear boundary and product review ready compliance documentation.

Continuous Readiness Insights: Track real-time status and identify gaps early.

Reduced Rework: System updates automatically flow into documentation and reporting.

A BETTER APPROACH TO CMMC

Traditional CMMC preparation is fragmented, manual, and expensive. Blade Validate transforms compliance into a repeatable, scalable, and data-driven process giving you confidence in your readiness and clarity in your path forward.

HOW IT WORKS

Blade Validate turns complex CMMC Level 1 or 2 requirements into a clear, simple to use workflow your team can follow with confidence.

1

CAPTURE YOUR SYSTEM

Import existing artifacts or define your system using structured inputs.

2

BUILD YOUR MODEL

Blade Validate generates a complete system representation, including architecture diagrams and data flows.

3

ASSESS COMPLIANCE

Automatically evaluate your system against CMMC controls and identify gaps.

4

GENERATE OUTPUTS

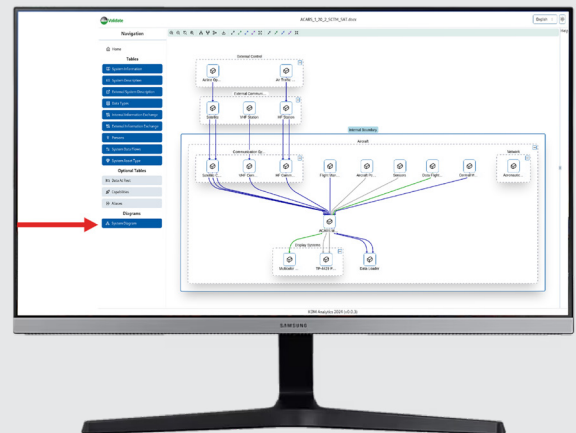

Produce all required documentation consistent, complete, and audit-ready.

5

MAINTAIN CONTINUOUS READINESS

Update your system once, Blade Validate updates everything.

- Up to **80% reduction** in compliance effort and cost.
- **2-hour assessment** workflows vs. weeks of manual effort.
- **Reduced risk of audit** findings through consistent documentation.
- **Elimination of manual rework** with model-driven updates.
- **Scalable** across programs, systems and contracts.

GET STARTED

Modernize your compliance process. Reduce Risk. Walk into your CMMC assessment prepared, not reactive. Contact ADS to schedule a demo of BLV.
