Why Choose ADS?

Acquired Data Solutions (ADS) has 30 years experience providing technology solutions for the engineering and software life cycle. Whether you are researching, designing new technology, validating requirements, or building manufacturing products; our system expertise enables us to develop a customizable solution crafted from fully designed software and quality hardware systems. ADS integrates software and hardware to design a solution that engineers your vision while reducing development time, increasing system performance and generating results based on collected data.

Who We Have Helped

- **Technology:** automated design verification test system for new device design.
- **Aerospace & Defense:** laboratory automation system.
- **Energy:** functional & operational test for real-time energy efficient simulation.
- **Medical:** medical laboratory testing and automation system.
- **Autonomous & Robotics:** software defined robotic arm automation.

SERVICES

- Data Acquisition Controls
- Embedded Systems & Processors
- FPGA Programming
- System Integration
- Remote Instrumentation Control
- Legacy Upgrades
- Software Solutions Consulting
- Program Management
- NI-based Systems (LabVIEW, TestStand, PXI, cRIO, cDAQ, VeriStand, DIAdem)

SOFTWARE EXPERTISE

- | | |
|------------------|-----------------|
| • LabVIEW | • Linux |
| • TestStand | • .XML |
| • LabWindows/CVI | • MS Access |
| • Python | • SQL Server |
| • C+/C++ | • Visual Studio |
| • .Net | • AI/ML/DL |

QUALIFICATIONS

- NI Silver Alliance Member
- Certified LabVIEW Developers
- TestStand Developer
- Certified MATLAB Associate
