

CYBERSECURITY ARCHITECTURE & COMPLIANCE AUTOMATION

FOR MORE INFO
www.acquiredata.com

OVERVIEW

ADS delivers comprehensive cybersecurity services that help organizations secure critical systems, achieve regulatory compliance, security and reduce operational risk. Our team provides end-to-end support across the cybersecurity lifecycle, including cybersecurity assessments, security engineering, Risk Management Framework (RMF) and ATO support, compliance reporting, POA&M management, risk assessments, CMMC readiness, zero trust implementation and security documentation.

By combining technical expertise with proven methodologies, we help federal agencies and commercial organizations strengthen their security posture, streamline accreditation efforts, and maintain compliance while enabling mission success.

CORE CAPABILITIES

Cybersecurity architecture design integrating encryption, access control, endpoint protection, & continuous monitoring.

RMF and ATO support for secure and unclassified environments, including documentation, POA&M management, and compliance reporting.

Zero Trust implementation using identity verification, micro-segmentation, least privilege, ZTNA, SASE, and EDR concepts.

Continuous monitoring and risk reduction to improve visibility, incident response, audit readiness, and operational resilience.

WHO CAN WE HELP

ADS provides cybersecurity and compliance support to organizations that operate mission-critical, regulated, and high-security environments including:

- Department of War (DOW)
- Department of Justice (DOJ)
- Federal Civilian Agencies
- Defense Industrial Base (DIB) Contractors
- Healthcare, Research & Laboratory Organizations

PROTECT. VALIDATE. SUSTAIN

Services, architecture, and automation for measurable cyber resilience.

STRATEGIC APPROACH

1

ASSESS & ALIGN

Establish the security baseline, identify mission priorities, and evaluate risk using NIST and FedRAMP aligned assessments.

2

ARCHITECT FOR RESILIENCE

Design scalable, policy-driven architectures for Zero Trust and continuous monitoring built in from inception.

3

IMPLEMENT & INTEGRATE

Deploy compliant, interoperable solutions that unify security, performance, governance, and user experience.

4

GOVERN & SUSTAIN

Maintain compliance through automated RMF workflows, lifecycle management, reporting, and audit readiness.

CYBERSECURITY SOLUTIONS

ADS complements hands-on cybersecurity services that automate cyber risk assessment and CMMC readiness, helping teams reduce manual effort and maintain stronger compliance evidence.

AUTOMATED CYBER RISK ASSESSMENT

Automates the assessment, prioritization, and mitigation of cyber risks across production-floor and enterprise systems. Supports defense-grade risk analysis for industrial environments.

CMMC READINESS AUTOMATION

Automates key CMMC Level 1 and Level 2 readiness activities, including system documentation, security diagrams, POA&Ms, compliance reporting, affirmations, and recertification support.

PROVEN IMPACT

25%

**Faster ATO
Timelines**

through automated
RMF workflows

40%

**Improved incident
response**

via SIEM & endpoint
consolidation

100%

**Compliance
achieved**

across DOJ, DHS, &
FBI systems
